

# ASSETWISE DELIVERS

# 5 ESSENTIALS FOR

## COMPREHENSIVE

# LINEAR ROAD NETWORK MANAGEMENT

### MANAGE

Manage complex road networks and associated information including assets and linear events

### LOCATE

Locate and manage spatially enabled asset information in an integrated environment for data consistency

### STREAMLINE

Streamline HPMS and MAP-21 reporting compliance with dynamic segmentation for efficient, accurate, and timely submissions

### MATCH

Match intuitive user workflow processes with a business data-driven approach for improved productivity

### SUPPORT

Support multiple linear referencing methodologies and different network types through flexible and configurable data modeling
