

# Workspace Development Workshop MicroStation

## PLAY TYPE

CE Fast Track Services

## OBJECTIVE

Understanding how to configure a workspace, how to set-up a workspace test environment and establish a test environment completion schedule

## DIGITAL WORKFLOW

This is part of the Digital Roadmap to move to the CONNECT Edition software

## DEPENDENCIES

Availability of a representative from the client to coordinate the appropriate people

The Virtual Workspace Development Workshop is part of the CONNECT Edition Adoption Initiative FastTrack Services that will produce a functioning user Workspace in MicroStation CONNECT Edition.

## Purpose

For those users who have not upgraded to MicroStation CONNECT Edition, this virtual Workspace Development Workshop provides an opportunity to discuss and review the MicroStation Workspace with a Bentley Consultant.

A Bentley Consultant will work interactively in virtual sessions to identify, update and recommend configurations and CAD standards based on good practices.

## Scope

This virtual Workspace Development Workshop includes the following tasks:

- Four virtual sessions designed specifically for CAD Managers that includes basic configuration, best practices and exposure to new functionality that can enhance workflows
- Content will be selected based on user workflows, requirements and environment
- Support Test Plan development
- Work collaboratively to set-up Workspace test environment and agree on completion schedule
