

Analyze MDL\VBA and Customizations MicroStation

PLAY TYPE

CE Fast Track Services

OBJECTIVE

Understanding how to customize the interface and how VBA and MDL customizations should be addressed.

DIGITAL WORKFLOW

This is part of the Digital Roadmap to move to the CONNECT Edition.

DEPENDENCIES

Availability of a representative from the client to coordinate the appropriate people.

The Virtual MicroStation Analyze MDL\VBA and Customizations FastTrack Service results in understanding how to customize the interface and the next steps to be taken to convert your VBA and MDL customizations into macros.

Purpose

For those users who have not upgraded to MicroStation CONNECT Edition, this virtual Analyze MDL\VBA and Customizations FastTrack service provides an opportunity to discuss and review with a Bentley Consultant the existing user interface and how it can be migrated to MicroStation CONNECT Edition. It is intended to help organizations understand how to customize the interface and use the Bentley Macro Recorder.

The Bentley Consultant engages with the user in interactive virtual sessions.

Scope

The Virtual MicroStation Analyze MDL\VBA and Customizations FastTrack service includes the following:

- Two virtual interactive sessions include exposure to various interface functionality improvements that can enhance workflows.
- One virtual session includes discussions about using Bentley Macro Recorder to replace legacy VBA and MDL customizations.
- Content will be selected based on user workflows, requirements and the user Workspace.
- Allotted time allows for initial discussions to interactively review user VBA and MDL customizations.
