Bentley Systems Welcomes Founder, Development and Services Team, and Users of *ComplyPro* to Advance *Progressive Assurance*

Leading Software for Infrastructure Requirements Management to be Expanded through a Connected Data Environment for Infrastructure Project Delivery and Asset Performance

LONDON – The *Year in Infrastructure 2016* Conference – 2 November 2016 – Bentley Systems, Incorporated, a leading global provider of comprehensive software solutions for *advancing infrastructure*, today announced that it has acquired the assets, colleagues, and services underlying *ComplyPro*, leading provider of UK-based managed services for requirements management of infrastructure capital projects. The new *ComplyPro* team at Bentley Systems will be led by its founder, Chris Rolison. Development of software and services will continue in Birmingham, UK, and sales activities will be merged into Bentley Systems’ offices worldwide. Existing *ComplyPro* users can be confident of continuously broadened functionality, with *progressive assurance* a valuable new capability within the *Connected Data Environment* shared by Bentley’s *ProjectWise* and *AssetWise* offerings.

Chris Rolison launched *ComplyPro* in 2005 and brings to Bentley Systems decades of experience in improving project assurance and compliance functions. In addition to his *ComplyPro* responsibilities, Chris is joining Bentley’s OpenRail Task Force to help bring to digital railway programs *progressive assurance* benefits, from systems-engineering-based conception through operations. *ComplyPro* users will benefit from the expanded scope of resources and integration across CAPEX and now additionally OPEX asset lifecycles. About the acquisition, Comply Serve founder Chris Rolison, said, “My *ComplyPro* colleagues and I are excited to join Bentley Systems. I have long regarded Bentley’s comprehensive approach to

software provision for advancing infrastructure to be where the potential for *progressive assurance* can be most effectively and timely realized.”

Bhupinder Singh, Bentley’s chief product officer, said, “Users we share with *ComplyPro*, such as Crossrail, have stressed to us the potential benefits to asset program owners that could result from the integration of their requirements management and compliance management functions within Bentley’s project delivery and asset performance solutions. Now we can continue to learn from the cumulative and ongoing experience of existing *ComplyPro* users, as they further apply cloud services across their TOTEX lifecycles. As *AssetWise CONNECT Edition* now joins *ProjectWise CONNECT Edition*, this provides the ideal opportunity for us to implement the full scope of *progressive assurance* advancing, through digital engineering models, to asset performance modeling. We welcome Chris Rolison and our new colleagues from *ComplyPro* to contribute to the continuous realization of this new BIM advancement for our *Connected Data Environment*.”

About *ComplyPro*

ComplyPro is a leading software service for tracking and management of requirements compliance within many industries including rail, aviation, and energy. The *ComplyPro* cloud service spans long and complex supply chains and geographically dispersed teams. *ComplyPro* is used for some of the world’s largest infrastructure projects including London’s Crossrail, Qatar Rail’s Doha Metro and Lusail Light Rail programs, and the Banedanmark Signalling & Electrification programs in Denmark. The Build News 2016 Infrastructure Awards recognized *ComplyPro* for “Best Infrastructure Project Compliance & Assurance” in the United Kingdom.

About Bentley Systems

Bentley Systems is a global leader in providing architects, engineers, geospatial professionals, constructors, and owner-operators with comprehensive software solutions for advancing the design, construction, and operations of infrastructure. Bentley users leverage information mobility across disciplines and throughout the infrastructure lifecycle to deliver better-

performing projects and assets. Bentley solutions encompass *MicroStation* applications for *information modeling*, *ProjectWise* collaboration services to deliver *integrated projects*, and *AssetWise* operations services to achieve *intelligent infrastructure*—complemented by worldwide professional services and comprehensive managed services.

Founded in 1984, Bentley has more than 3,000 colleagues in over 50 countries, more than \$600 million in annual revenues, and since 2009 has invested more than \$1 billion in research, development, and acquisitions.
